

# THE CLEAN ENERGY MARKETPLACE

## Opportunities and Challenges for Disruptive Innovation

**September 24, 4:30–7:00pm**

Wisconsin Energy Institute, Room 1115  
1552 University Avenue,  
Madison, WI 53726

## JOIN US

Major changes are happening in energy markets. With the widespread adoption of renewables like wind and solar and transformative energy storage technologies and bio-based chemicals around the corner, the opportunity for market disruption in energy has never been higher.

These opportunities also create challenges for research institutions, private companies, policy makers, and regulators. Join the Wisconsin Energy Institute, the Wisconsin Conservative Energy Forum, and the American Conservation Coalition for an evening of discussion on these opportunities and challenges and a way forward to mark National Clean Energy Week.

## SCHEDULE

**Panel discussion**  
4:30–5:45 pm

**Reception and  
student poster session**  
5:45–7:00 pm
